Seeking to leverage ***full-stack software development and data analytical*** skills to alleviate technical bottlenecks and optimize system performance in a Software Engineering Intern position. I'm excited about the opportunity to deepen my understanding of scalable software architecture and microservices. As of today, I am ready to contribute as a full-time Software Engineering Intern at your company.

My Portfolio: https://sakinak-36.github.io/personalPortfolio/

Project experience

1. **EngiQuiz**| Frontend Developer *Remote* |*09.2026*

• Built an interactive engineering quiz platform offering timed evaluations, instant answer feedback, and automated score generation.
• Integrated client-side state management for seamless quiz progression and dynamic results summaries.
• Optimized bundle size and asset loading speeds using Vite and Tailwind CSS.

2. **Job-hunt** | Full Stack Developer *Remote | 08.2026*

• Engineered a full-stack job portal supporting multi-role authentication for job seekers and recruiters using Next.js and Prisma ORM.
• Implemented real-time applicant tracking pipelines (ATS), allowing candidate status progression across hiring rounds.
• Built dynamic candidate profiles featuring resume uploading, direct application notes, and transparent salary filtering.

3. **Weather Pulse** | Frontend Developer *Remote | 06.2026*

• Built a single-page weather dashboard fetching live weather metrics and forecasts via Open-Meteo API.
• Implemented TypeScript interfaces for robust type safety across asynchronous API responses and state handling.
• Configured automated deployment workflows using GitHub Actions and GitHub Pages.

Education

College Of Technology and Engineering (MPUAT)| Bachelor's Degree *Udaipur, Rajasthan| 07.2024 - present*

• BTech in Computer Science and Engineering (Expected Graduation: 06/2028)
• Cumulative CGPA: 8.0 / 10.0

Maharana Mewar Public School | High School Graduate *Udaipur, Rajasthan| 01.2016 - 02.2023*

• Senior Secondary (12th Standard) - Science Stream
• Graduated with Distinction (90.2%)

Skills

Languages & Frontend: JavaScript, TypeScript, React, Next.js, C++, Java, Python, HTML, Tailwind CSS|

Backend & Databases: Node.js, Express, Socket.IO, PostgreSQL, PrismaORM, MySQL, Apache Kafka, REST APIs|

Git Tools & Workflow: Vite, Git, GitHub Pages, GitHub Actions|

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming (OOP), Data Analysis |

Languages Spoken: English (Upper Intermediate), Hindi (Intermediate), French (Beginner)|

■ *All professional proficiency or above*

Certifications

- JPMorgan Chase Software Engineering Simulation: Integrated Kafka into a Spring Boot microservice to consume high-volume transactions, managed persistence with Spring Data JPA/H2 database, and connected external REST APIs.
- Siemens Mobility Simulation: Developed strategic KPIs and Excel dashboards to monitor rail infrastructure projects and optimize stakeholder communication.
- Deloitte Data Analytics Simulation: Performed forensic technology data analysis and created interactive data dashboards using Tableau.
- Certification of Job Simulation Completion. (06/2026)
- Data Science with Python Course on Cognitive.ai. (06/2026)
- Web Development with ApnaCollege. (09/2026)
